

# Malaria Deaths in Africa: 2000-2014

Which countries are most affected?

Darker shading marks a higher number of deaths caused by Malaria. Select a country on the map to explore how the number of malaria deaths have changed over time.

How have the number of malaria deaths changed over time in Kenya?

Malaria deaths are easily preventable. Help today: <https://www.malariamore.org.uk/>

"Kenya is the #1 country in Africa most affected by malaria."

Deaths caused by malaria had risen above the country average (27,896) in the years 2000 to 2003. I selected Kenya on the map in this graphic panel, displaying a peak of over 50K deaths in the year 2003 before dropping to about 25K in 2004. An incline in deaths in the next 2 years averaged about 43K. After 2010 through 2014 a sharp decline of deaths from malaria fell below the continent average(1K).

How have the number of malaria deaths changed over time in **Angola**?

Malaria deaths are easily preventable. Help today: <https://www.malariamore.org.uk/>

**"Angola is the 3rd most affected by malaria"**

The progress report of deaths in Angola from the malaria pandemic shows an average rate of 11,469 per year from 2000 to 2014. Note the explosive surge in 2013 close to 39K deceased in one year alone. While this country has the 3rd largest death toll on the continent, this data could predict a slightly consistent decline of deaths from malaria over time.
